DETAILED ACTION

Priority

If applicant desires to claim the benefit of a prior-filed application under 35 U.S.C. 120, a specific reference to the prior-filed application in compliance with 37 CFR 1.78(a) must be included in the first sentence(s) of the specification following the title or in an application data sheet. For benefit claims under 35 U.S.C. 120, 121 or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of the applications.

If the instant application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable

Art Unit: 2875

petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

Art Unit: 2875

The oath or declaration is defective because:

It does not identify the mailing address of each inventor. A mailing address is an address at which an inventor customarily receives his or her mail and may be either a home or business address. The mailing address should include the ZIP Code designation. The mailing address may be provided in an application data sheet or a supplemental oath or declaration. See 37 CFR 1.63(c) and 37 CFR 1.76.

It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either on an application data sheet or supplemental oath or declaration.

It does not have the signatures of each inventor.

Drawings

The drawings are objected to because Figure 15 has incomplete reference numerals on the far left. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the

Application/Control Number: 10/707,617

Art Unit: 2875

examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

- 4. The disclosure is objected to because of the following informalities:
 - a. Page 4, Paragraph 28, Line 1: Misspelling "electro luminescent" should read as "electroluminescent";
 - b. Page 6, Paragraph 31, Line 3: Typographical error "surface 210" should read as "surface 310";
 - c. Page 8, Paragraph 36, Line 7: Typographical error "safety sing" should read as "safety sign";
 - d. Page 10, Paragraph 42, Line 4: Typographical error "on the real" should read as "on the rear";
 - e. Page 10, Paragraph 45, Line 4: Grammatical error delete comma; Appropriate correction is required.

The following claims have been interpreted in light of the specification, but rendered the broadest interpretation as construed by the examiner [MPEP 2111].

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/707,617 Page 6

Art Unit: 2875

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 5. Claims 1-3, 6-7, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffman (U.S. Patent 5339550).
- 6. With regards to Claim 1, Hoffman discloses an electroluminescent (EL) safety sign and method of assembly [see Abstract] including:
 - An electroluminescent element having a base [Figure 1: (10)] and an EL portion [Figure 1: (12)] adhered [Figure 1: (24)] to the base with power source [Figure 1: (14, 16, 28)];
 - Applying a pattern layer [Figure 1: (18)] with safety indicia [Figure 1: (20)] over the EL portion; and
 - Applying a tinting layer over the pattern layer [Column 1, Lines 23-25; Column 2, Lines 64-68].

It should be noted that signs are intended to convey messages, whereby a safety sign, as broadly interpreted, does not attain any unique status.

- 7. With regards to Claim 2, Hoffman discloses an EL element that includes an AC or DC power source [Column 2, Lines 56-58].
- 8. With regards to Claim 3, Hoffman discloses applying the safety sign to an article of clothing [Column 6, Lines 3-7].
- 9. With regard to Claims 6-7, Hoffman discloses applying the safety sign to a vehicle/recreational vehicle [Figure 5; Column 6, Lines 3-7].
- 10. With regard to Claim 10, Hoffman discloses applying a layer that protects the EL device from damage [Figure 1: (22); Figure 8: (74); Column 5, Lines 8-10].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 4-5 and 8-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoffman (U.S. Patent 5339550).

Hoffman discloses the claimed invention as cited above, but does not specifically teach applying the safety sign to a hat (re: Claim 4), a snowplow (re: Claim 5), an SUV (re: Claim 6), nor to an animal collar (re: Claim 7).

However, Hoffman discloses, "While the discussion of the invention has emphasized its use in connection with motor vehicles, specifically automobiles, signs according to the invention could also be mounted on trucks, boats, and the like, or on articles of clothing or the like, where not otherwise limited [Column 6, Lines 3-7]."

It would have been obvious to one ordinarily skilled in the art that one could apply the safety sign to a hat or animal collar, which are commonly known articles of clothing and known within the art, as well as to a snow plow or SUV, which are commonly known trucks or large vehicles. In doing so, safety and visibility of the person/animal/large vehicle would increase.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2875

The following references are further cited to show the state of the art pertinent to the current application, but are not considered exhaustive:

US Patent 6874904 to Hsu;

US Patent 6551726 to Burrows;

US Patent 6112437 to Lovitt;

US Patent 5692327 to Wynne et al;

US Patent 4895110 to LoCascio.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason M. Han whose telephone number is (571) 272-2207. The examiner can normally be reached on 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on (571) 272-2378. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
